Composition of Extract Preparation

Native dry extract
Maltodextrin (if it is necessary)
Colloidal silicon dioxide

Extract Specifications

| Loss on drying: | ≤ 6 % w/w |
| Total ash:      | ≤ 15 % w/w |
| Heavy metals:   | Analysis of Pb, Hg, Cd and As                      |
| Microbiological assay: | According to Ph.Eur.current Ed "5.1.8.Point B" |
| Residual solvents: | According to guidelines CPMP/ICH/283/95 |
| Assay (HPLC):   | Total Rosavins                                     |
|                 | Salidroside                                         |

REGISTRY NUMBERS

CAS: 92457-37-9
EINECS: 296-320-5
INCI/UE: SEDUM ROSEA ROOT EXTRACT

INFORMATION ABOUT PLANT ORIGIN

Botanical Description

Underground parts consist of numerous rhizomes united at their base into a long taproot. Both the rhizome and root exhibit secondary growth. Pieces of rhizomes are thick, wrinkly, with remains of stems and scales, and pieces of roots branching off the rhizome. The surface of the rhizome and the roots is shiny, grayish-brown; after peeling off the cork, a golden-yellow layer is revealed; fracture, pinkish-brown or light brown.¹

Analytical marker / Active principle

Rosavin
Salidroside

Rosin
Rosarin
PHARMACOLOGICAL STUDIES

- Improves physical and mental performance in fatigue situations as well as working capability: improved recovery time, strength, endurance, cardiovascular measures, and coordination.2,3,4,5
- Effect on depression and anxiety: improves depression symptoms according to Hamilton scale for depression and anxiety (HAMD and HAMA).2,4,5
- Improves visual perception, short-term memory and attention: clinical assays had proved a positive dose dependent effect regarding exhaustion, low motivation, somnolence, low libido, sleep disorders and cognitive deficiencies.2,4,5

PHYTOTHERAPY

Activities

Oral Use 2,3,4,5
- Anti-fatigue
- Stress-protective effects
- Adaptogen

Topical Use 6
- Antioxidant
- Astringent
- Skin conditioning

Indications:

Oral Use 2,3,4,5
- Indicated to increase work capacity, resilience and improve recovery time.
- Traditional use for temporary relief of symptoms of stress, such as fatigue and sensation of weakness.
- Indicated for treatment of mild to moderate depression and/or anxiety.

Topical Use
- Formulated in products anti-aging and skin care protection.

Undesirable effects:

There are no reported toxic effects or intolerance phenomenon to normal use doses.3

Contraindications and special warnings:

- Hypersensitivity to the active substance.3
- Safety during pregnancy and lactation has not been established. Therefore is not recommended.3
- The safety in children and adolescents under 18 years of age has not been established. Therefore is not recommended.3

A doctor or qualified health care practitioner should be consulted.

Dosage and administration:

Recommended dosage and administration is indicated in the Community herbal monograph on Rhodiola rosea L., rhizoma et radix. EMA/HMPC/232091/2011.3
